Day 3 – Wednesday – July 4 - Cairo

After breakfast, you will experience one of the world's most awe-inspiring sites; the Giza Plateau. Here stands three Pyramids, the greatest being that of Cheops. It is generally believed the Great Pyramid was built as the tomb of Fourth dynasty Egyptian pharaoh Khufu (Cheops), after whom it is sometimes called Khufu's Pyramid or the Pyramid of Khufu. It took 100,000 workers more than 20 years to construct. A few hundred meters south-west of the Great Pyramid lies the slightly smaller Pyramid of Khafre, one of Khufu's successors who is believed to have built the Great Sphinx, and a few hundred meters further south-west is the Pyramid of Menkaure, Khafre's successor, which is about half as tall. In modern day, the pyramid of Khafre is the tallest of the three pyramids since the Great Pyramid has lost about 30 feet of material from its tip. Entrance into one of the pyramids will be included. Southeast of the Great Pyramids is the Sphinx, carved out of solid natural rock in about 2650BC, a magnificent monument with the head of the Pharaoh and the body of a lion. After lunch, you will make a stop at a carpet school and factory where you will see how some of the world's most beautiful carpets are made. Then you will visit the Saqqara Complex where you will see the first Pyramid ever built, the Step Pyramid of Zoser. When Memphis was capital of Egypt, during the Old Kingdom period, Saqqara was its necropolis. Spread over seven kilometers of desert, Saqqara is one of the most important archaeological sites in the world. Built for King Zoser of the third Dynasty by the architect and genius Imhotep, who designed Saqqara and its surrounding complex to be as grand as it was unique and revolutionary. Imhotep was the first to build stone tombs in honor of the king's majesty. His many titles included 'Treasurer of the King of Lower Egypt', 'Administrator of the Great Palace', and 'Imhotep the Builder, the Sculptor, the Maker of Stone Vessels'. Before returning to the hotel a stop will be made at the remains in Memphis, the first capital of united Upper and Lower Egypt.

Day 4 – Thursday – July 5 - Cairo/Abu Simbel/Aswan

Early morning transfer to the airport for your flight to Abu Simbel an archaeological site comprising two massive rock temples in southern Egypt on the western bank of Lake Nasser about 290 km southwest of Aswan. It is part of the UNESCO World Heritage Site known as the “Nubian Monuments. The twin temples were carved out of the mountainside during the reign of Pharaoh Ramesses II in the 13th century BC, as a lasting monument to himself and his queen Nefertari, to commemorate his alleged victory at the Battle of Kadesh, and to intimidate his Nubian neighbors. The complex was relocated in its entirety in the 1960s to avoid being submerged during the creation of Lake Nasser, the massive artificial water reservoir formed after the building of the Aswan dam on the river Nile. After your visit fly to Aswan where you will embark on your Nile cruise. Lunch and then a short ride will bring you to Aswan’s High Dam, Granite Quarries, and Unfinished Obelisk, and then continue by felucca to visit Kitcheners Island with its beautiful gardens and to view the mausoleum of the Agha Khan.

Day 5 – Friday – July 6 – Aswan/Kom Ombo/Edfu

After breakfast, sail in a small boat to the Philae Temple situated on the island of Agilika. Like Abu Simbel, the temple was relocated in order to protect it from the rising water of the High Dam, built in 1960. The main sanctuary on the island is dedicated to the Goddess Isis and her son Horus. Ancient Egyptians believed that Isis was the Goddess of Magic, and when she wept, the Nile flooded. This afternoon set sail for the city of Kom Ombo. Known as “Ombos” in ancient times, the city became prosperous when the temple was built in the Ptolemaic era. The temple is divided into two symmetrical halves. The left side is dedicated to the falcon-headed god, “Haroeris,” and the right side to the crocodile god, “Sobek”. Reliefs of Ptolemaic Pharaohs are found in the porch area. The remainder of the temple consists of a crypt, chapels, Roman wells where sacred crocodiles may have been kept, and the remains of a birth house. On the walls of the temple, you will see the first recorded representation of medical instruments. Sail onto Edfu, midway between Aswan and Luxor.

Day 6 – Saturday – July 7 - Edfu/Luxor

Begin the day by visiting the magnificently preserved temple of Edfu. The sandstone temple of Horus, the Sun God, was built under the Ptolemies and completed by the mid first century, BC. In the colonnaded court, you will see the surviving statue of a pair of falcons representing Horus. A series of smaller chambers leads to the Sanctuary of the God, which is lit by three openings in the ceiling. Ceremonies, celebrations, and war scenes are shown on the walls of the temple. Later today, we sail to Esna, pass the lock, and arrive in Luxor, ancient Thebes. This afternoon explore the East Bank of the Nile including the Temple of Luxor. Here, the Avenue of Sphinxes, famous for its artistic degree of uniformity, leads to the entrance of the temple where a seated colossus of Ramses II and a towering Obelisk sit. Continue to the Karnak Temple, one of the most impressive monuments of ancient art and architecture in the world. The carvings, which adorn all of the walls, depict the history and conquests of many of Egypt’s Pharaohs.

KV 63 is the first tomb discovered in the Valley of the Kings since King Tut's KV 62 tomb was found intact in 1922. Many of the tombs, carved out of the bedrock, retain their original bright colors and fine relief's and scenes, thought to guarantee the safe passage of the Ka to the after life. Next, it is on to Deir El Bahri to visit the mortuary Temple of Queen Hatshepsut, considered being one of the finest buildings in Egypt. For those who prefer freshwater pursuits and refreshing fun, the 80-metre corkscrew water slide is part of the resort's 2500-square-metre water complex. Linked by bridges, staircases, ramps, gardens and rock formations, three cascading pools feature an amazing ten-meter drop.
